

High Frequency Co-axial This connector is for small high frequency coaxial signal which is suitable for automotive equipment such as ETC/DSRC, navigation system.

Applicable for surface mounting technology.

Board-to-wire/High frequency

Features

High Reliability

Terminal structure for automotive equipments. This small connector enables the retention force of more than 98 N with unique reinforcement tabs structure.

●Applicable Frequency 5.8 GHz

This connector is the most suitable for ETC/DSRC.

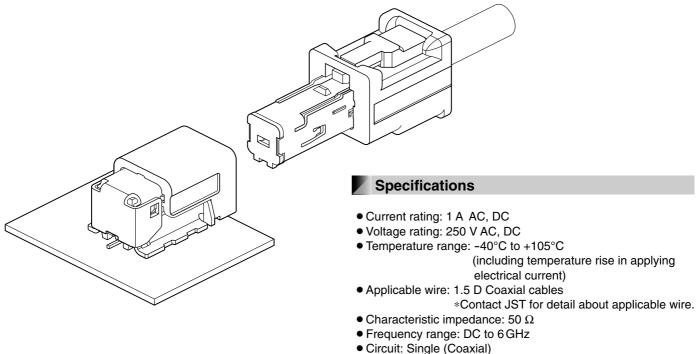

- VSWR : 1.5 Max
- Insertion Loss : -1.5dB Min

Compact Design

Connector width : 7.4 mm/ Height : 6.3 mm

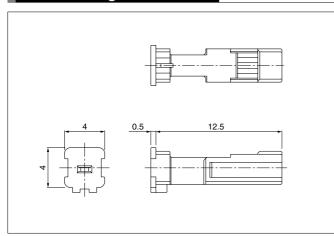

Noise Performance

Excellent performance by metal shell shielding structure.

- PC board mounting direction: Side entry (SMT)
- * Compliant with ELV/RoHS.
- * Contact JST for details.
